Bjørner's Austria-Forum Support Letter

Dear Professor Herman Maurer, Obmann [Chairman], **Austria-Forum**

- With this letter I wish to express my sincerest and strongest support to You with respect to **Austria-Forum**: <https://austria-forum.org/>.

*I find the **Austria-Forum** Web pages exhilarating informative – a true example of the great Austrian culture. In structure, contents and graphical layout **Austria-Forum** far exceeds in quality any other comparable national and international Web documents. I shall thus urge you (i) to seek funding for the renewal of **Austria-Forum** layouts, its management & maintenance and running costs and (ii) to find a sponsor, management and editorial structure for the day-to-day running of **Austria-Forum** – so that You eventually can safely entrust **Austria-Forum** in the hands of Your successors.*

- From a support statement from a Danish colleague of ours, at the University of Wien, I quote:
*“The scope of the **Austria-Forum** project is fantastic as it encompasses all aspects of Austrian culture past and present. The quality of the various texts as well as the choice illustrations and musical examples are likewise impressive. A perfect balance between scholarly depth and general accessibility has been achieved and strikes me as another indication of the project’s overall value. The **Austria-Forum** must be preserved for future generations. I urge all relevant organizations and authorities to offer the greatest possible financial support.”*

[Prof. Dr. Sven H. Rossel, Department of European and Comparative Literature and Language Studies, University of Vienna, Austria.]

- With my sincerest regards

I, Prof.
